ABOUT ME

Aspiring Junior Developer with a broad range of experience in the fields of educational and technology within public, private and charity sector organisations.

Experience of managing projects ranging from setting up and running a small business, to helping deliver national government funded programmes against a backdrop of uncertainty and rapid change during the Covid19 outbreak.

EXPERIENCE

SEND and Inclusion Manager

London Grid for Learning Trust (LGfL) Jan 2019 – Date

LGfL are a charitable trust who provide connectivity and a range of digital and educational products and services to over 3000 subscribing schools and more recently a number of open access services to schools across England. LGfL was the lead delivery partner of a national remote learning programme funded by the Department for Education. LGfL also undertake some of the UKs largest technology procurements and implementations.

Scope of role:

- Work with inhouse and external developers to create digital products for use within the organisation and the wider education sector.
- Overall responsibility for inclusion and accessibility training and resource production at LGfL
- Delivering regular face to face and online training sessions.
- Working with wider teams to organise training conferences for hundreds of delegates supported by large technology partners and world class presenters/experts in their field.
- Collaborations with large tech companies such as Google, Microsoft and Adobe
- Public speaking at events around inclusion, education and technology
- Publishing regular blog posts, monthly newsletters and developing social media networks
- Building strong professional networks crossing public, private and charity sectors.

Key Achievements:

- Instrumental in setting up the DfE Edtech Demonstrator Programme which is currently supporting over 4000 schools across England.
- Delivered talks on inclusion and technology at BETT (International Education Technology Conference) and The TES SEND Show (UKs premier special needs conference).
- Authored chapters in two books related to technology and special educational needs.
